

DID YOU KNOW HEART ATTACKS HAVE BEGINNINGS?

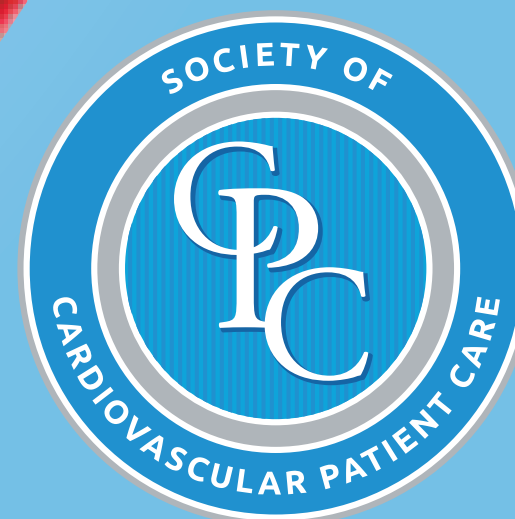

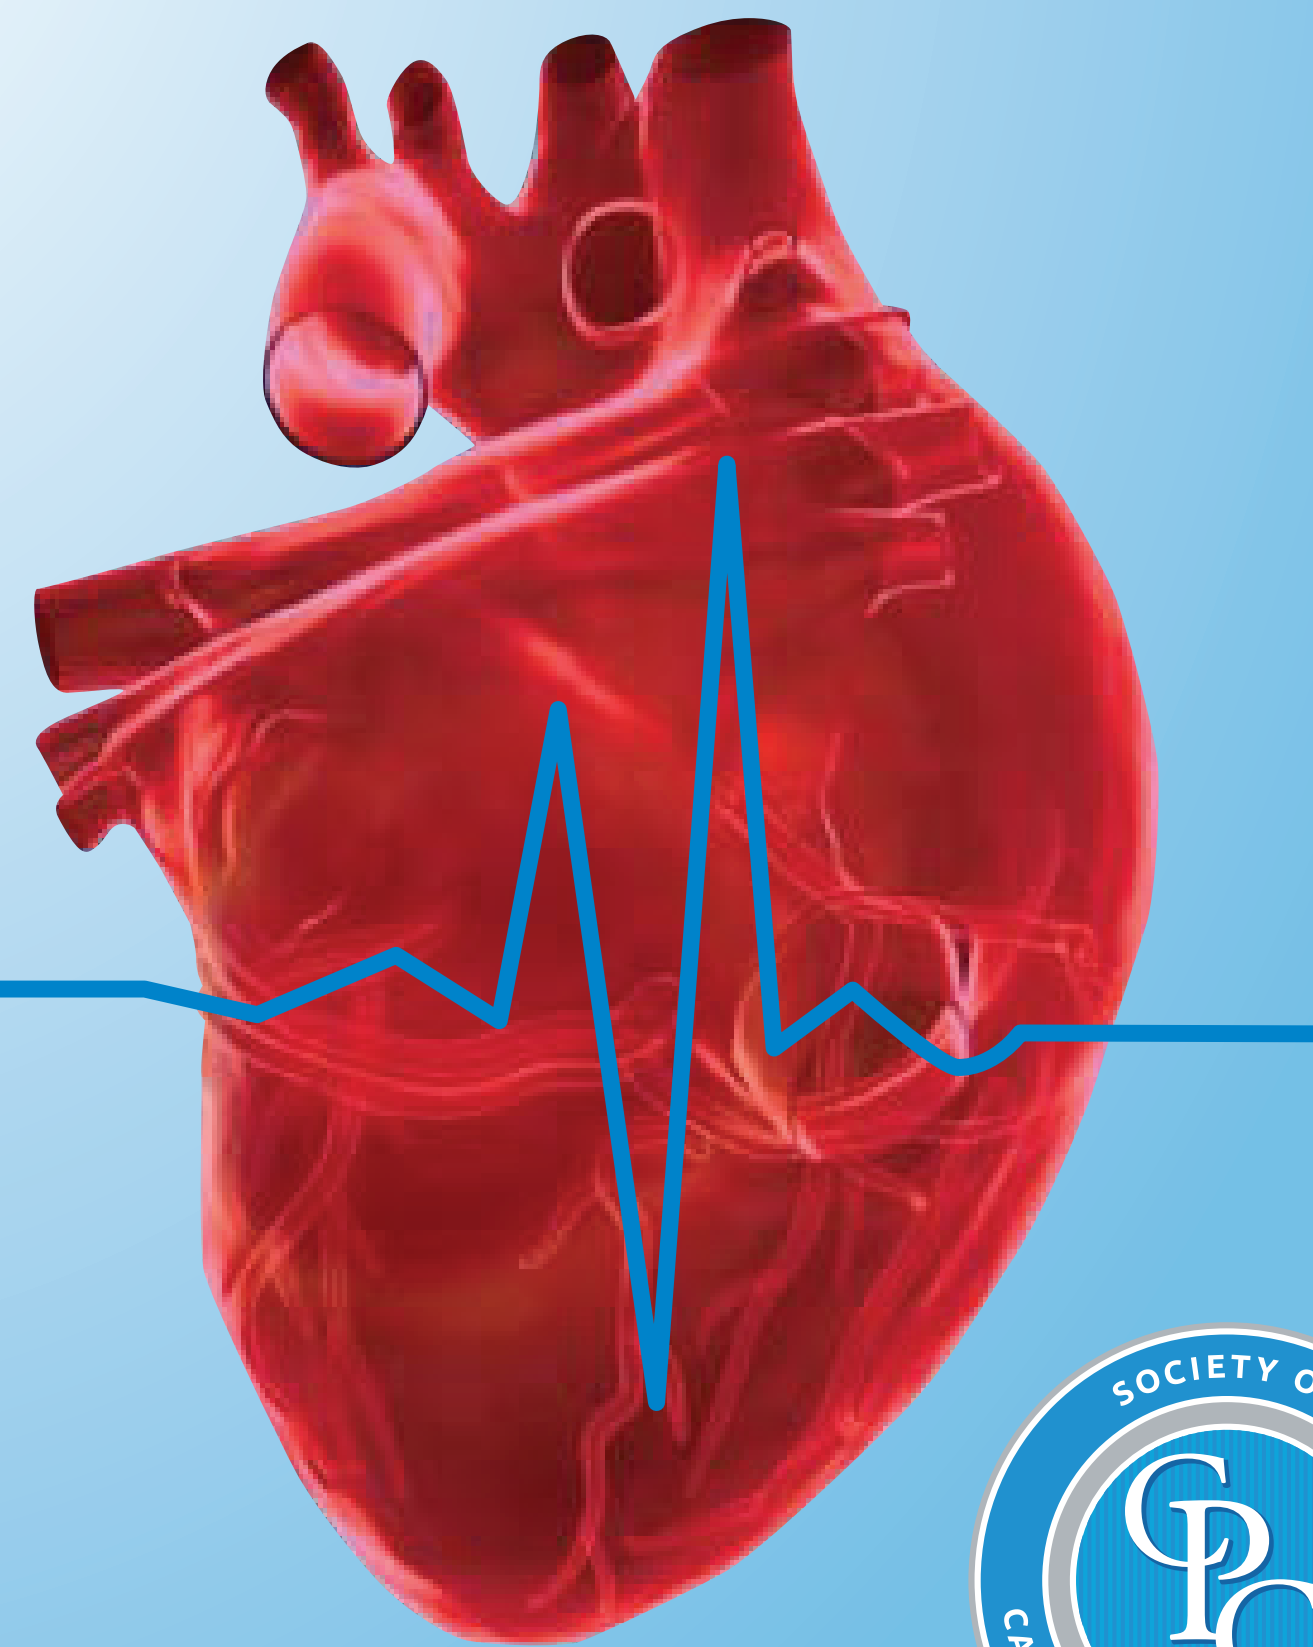

THESE “BEGINNINGS” OCCUR IN **OVER 50% OF PATIENTS.**
Most importantly, if recognized in time, these “beginnings”
can be treated before the heart is damaged.

ALARMING STATISTICS:

Heart disease causes 1 of every 4 deaths
in the United States.

About 50% of sudden cardiac deaths occur
outside a hospital. It’s important to know
early warning signs/symptoms.

85% of heart damage occurs within the
first two hours of a heart attack.

EHAC

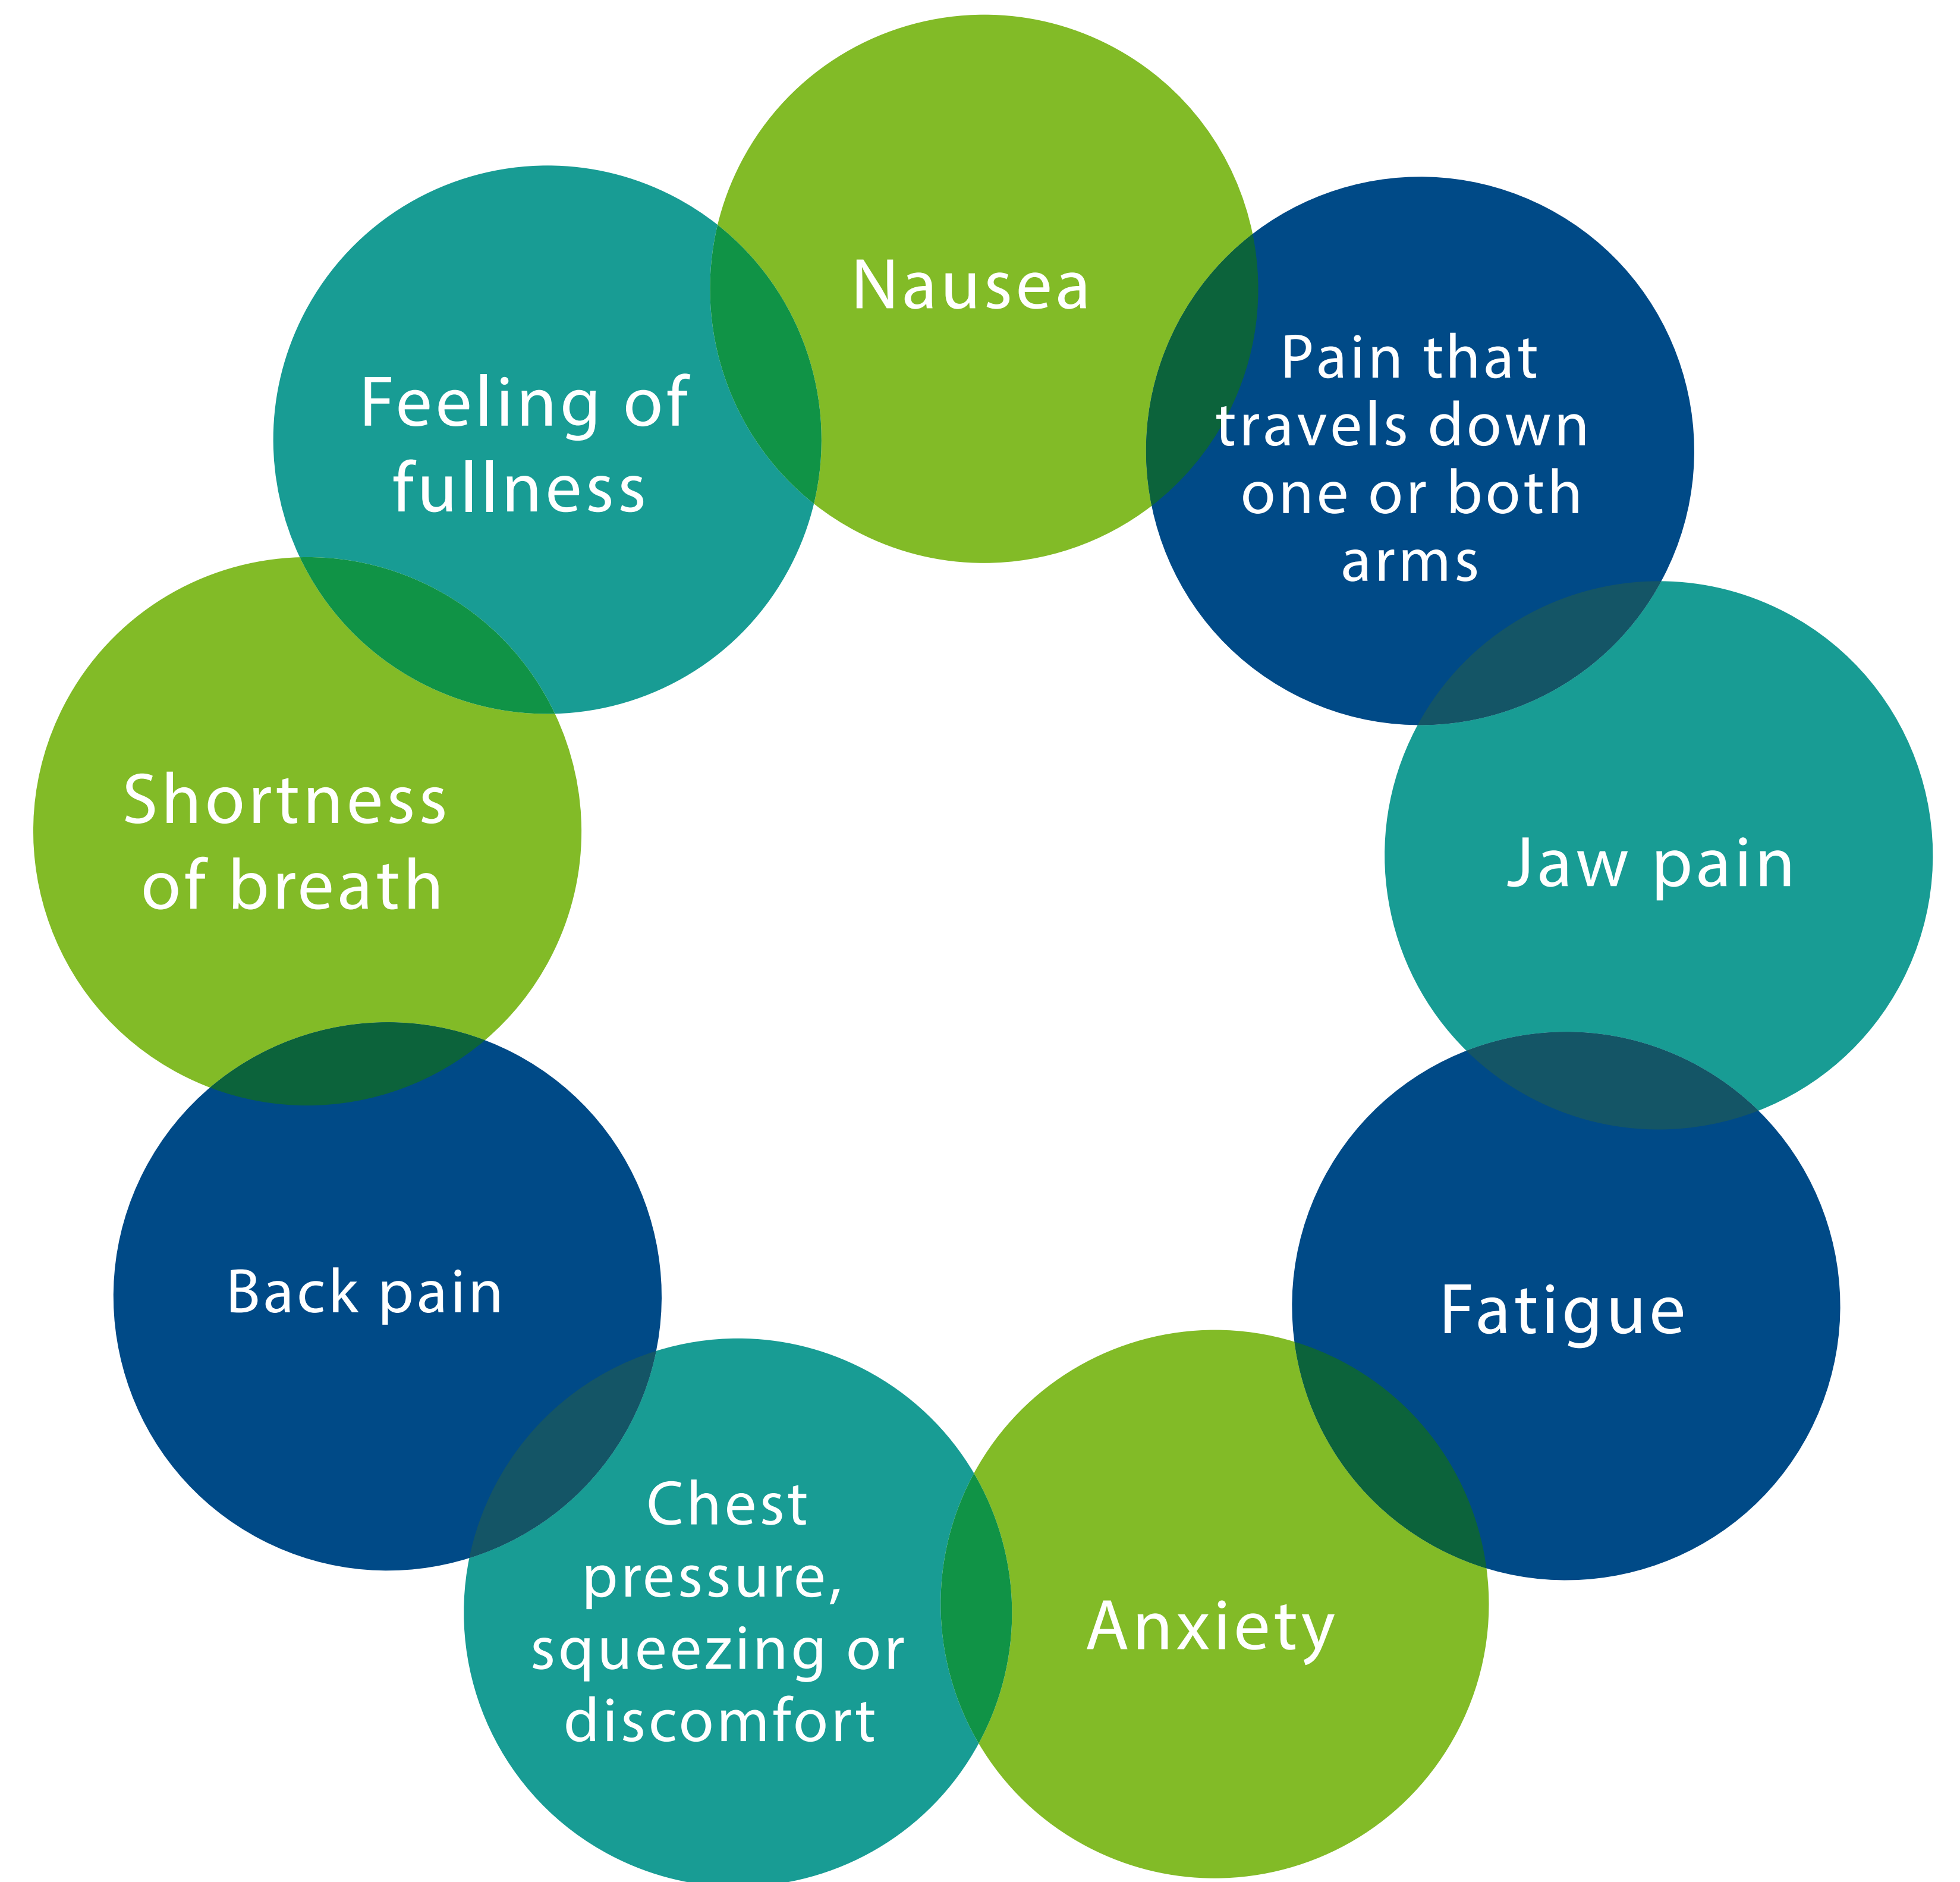

EARLY HEART ATTACK CARE

is knowing the subtle danger signs of a heart
attack and acting upon them immediately -
BEFORE HEART DAMAGE OCCURS

SO WHAT ARE THE EARLY SYMPTOMS OF A HEART ATTACK?

Remember, people may or may not experience any or all of these symptoms. People may
experience mild chest symptoms, such as pressure, burning, aching or tightness.
These symptoms may come and go until finally becoming constant and severe.

SURVIVE. DON'T DRIVE. CALL 9-1-1
